A DEMOCRATIC PLATFORM.

The Hon. David Bennett Hill recently addressed a letter to the General Assembly of Alabama, conveying his thanks for the joint resolution requesting him to address the Legislature, and expressing his regret at being unable to do so. Mr. Hill told his friends in Alabama that it was the duty of him and them as patriots and Democrats to strengthen the party organization, to unite all elements of opposition to radicalism, to organize for future contests upon right lines so as to make national victory again possible, to avoid recriminations and to subordinate all selfish and personal considerations in the exhibition of a widespread national and party patriotism.

"We should stand as a solid phalanx," he went on, "in favor of a strict construction of the Federal Constitution; for the preservation of the reserved rights of the States; for the maintenance of the constitutional currency of our fathers; for a system of public taxation imposed for public purposes only; for economy in all public expenditures and for the supremacy of the Constitution, with all its guarantees, over every portion of our national jurisdiction; and we should resist by every honorable means in our power the Republican efforts to fasten upon our country the evils of militarism, the wrongs involved in the diversion of public moneys in the shape of congressional subsidies, the tendencies toward centralization of power and the substitution of imperialistic ideas for the plain and simple theories of Democratic government. Upon all these issues the Democratic party is right, and sooner or later the right will surely prevail."

What a splendid Democratic platform that would make! If the next National Democratic Convention adopt a platform with these terse declarations of Mr. Hill as the basis, and then nominate Mr. Hill for the presidency, victory will be a foregone conclusion. The Republicans have had a long lease of power. The longer they stay in office the more distasteful do they become to the great Democracy of the country, and by the time that another presidential year comes around the Democrats will be ready for a

But Democrats do not like Populism any better than they like Republicanism. Indeed, many Democrats are more afraid of Populism than they are of Republicanism, because they have tried Republicanism and knew that it is not disastrous to the business interests of the country, while Populism is an untried quantity, threatening to overthrow all our business institutions. But if the convention will only adopt a good Demoeratic platform, such as Mr. Hill has outlined, and nominate Mr. Hill, or some Democrat like him, Democrats from all over the country will rise up as one man to support the platform and the ticket and the party will score the greatest triumph of its his-

WHAT'S THE MATTER WITH KANSAS?

"I consider Carrie Nation a female John Brown of a second emancipation," said the Rev. Dr. H. M. Wharton the other day at a meeting of the Anti-Liquor and Anti-Cigarette Society of Philadelphia.

Whether or not this was an attempt to glorify Mrs. Nation or to ridicule her by likening her to John Brown, we do not know. Dr. Wharton is a Southern man, and we can hardly believe that with all his eccentricities and sensationalism he is capable of paying tifilute, even in a Northern city, to John Brown. It is altogether proper, however, to put these two—

Human nature is much the same the world over. Blood is thicker than water, and when negro men assault white women, they will be summarily dealt with, whether the assault be

the same class, for they are two of a kind. John Brown's fanaticism ran towards slavery, and Mrs. Nation's fanaticism runs towards saloons. But they are products of the san e soil and they are of the same sort. Kansas is the great State of freaks and has produced more freaks to the square inch than any State in the Union. The State of Kansas was born in a storm. The people who settled it sowed the wind and subsequent generations have been reaping the whirlwind from year to year. Kansas is subject to climatic extremes. Sometimes the weather is delightful, but during a pleasant spell in winter. without any warning whatever, a blizzard will sweep across the plains and the next day the Ice King will be ruling supreme. In summer delightful breezes may be playing in the whiskers of the statesmen without causing a single unnumbered hair to fall to the ground, yet all of a sudden the hot winds from the South will begin to blow, and blow and keep on blowing from day to day until the corn, which but yesterday was green and beautiful, with silky tassels on every ear as long as the beard of the prophets of Populism, is parched and withered and burnt to a crisp. Kansas is a storm-centre and the State of Kansas was born in a storm of poli-

The history of Kansas from 1854 to 1861 is unique. There is nothing like it in the annals of the nation. Such rioting and revolution and political trickery were never known in any other State. John Brown helped to make the history of that time and schooled himself for the part which he afterwards played in the history of the nation. Then came Simpson, the sockless; Peffer, the bearded man; Ingails, the statesman out of a job: Mrs. Lease and Mrs. Nation, and finally Congressman Ridgeley, who introduced a bill to give to every man in the country a Government job at \$4 a day. They are all Kansas freaks, differing in the stamp of their fanaticism, but being of the same family and having the same general characteristies. Some are born in the blizzard, some are born while the hot winds are blowing, and some are born between seasons, but they are all the same sort of freaks. The Kansas variety is unique. Dr. Wharton is right in linking the name of Carrie Nation with that of John Brown. Par nobile fratrum, if Mrs. Nation will pardon the liberty we take with her sex.

HASTY LEGISLATION.

The newspapers of Richmond have shown that during the extra session of the Legislature just closed, a number of bills giving wide powers to private corporations were rushed through without having been printed or considered in committee, and of whose character the members, generally speaking, knew little or noth-

This sort of thing is getting to be too common in the Virginia Legislature and some vigorous action should be taken to put a stop to it. No bill, except under the most urgent circumstances, should be taken up and passed without having run the gauntlet of the committee rooms, and no new bills should be introduced within ten days or two weeks of final adjournment. Law-making is a serious business and it is not to be entered into hastily and unadvisedly. Every bill introduced should be carefully studied, line by line, by the proper committees before ever it is passed, and members should insist upon it that this course be taken before voting on

any measure. Too often these mischievous bills are rushed through under the pretext of being "purely local measures." At the regular session of the Legislature last winter, such a bill was put through without reference to committee, but somebody discovered the character of it, quite by accident, however, and upon further examination it was found that the bill permitted a corporation to run a gamgling institution, in defiauce of the anti-gambling law of the State.

When the regular session meets next winter, it is to be hoped that steps will be taken in advance to prevent a repetition of this practice.

LIGHT AT LAST.

Some time ago-only a few months ago, indeed—the Indianapolis News contained an editorial article in which the editor undertook to lecture the Southern people on the subject of lynching. But the darkness of the editor has been lightened by a recent incident. A white woman was assaulted by a negro man and the editor of the News makes this reference to

"People in this neighborhood ought to have a better understanding at least of, if not more sympathy with, the temper of our Southern brethren when the 'best' people of a commu-nity turn out and lynch a negro for assault. When a frail and innocent young woman is seized by a burly, black brute and subjected to the horblack brute and subjected to the nor-rible treatment suffered by Miss Dar-ter, the blood of every decent man boils with, indignation, and ven-geance, swift, sure, unwaiting, is the impulse. We are utterly and always opposed to summary justice by the mob, even of 'best' people. But we can now better, understand, how, strong now better understand how strong the temptation thereto can be. We carnestly hope that no possible effort will be left untried to discover the criminal and bring him to punishment. The county or the State might well offer a large reward for his anwell offer a large reward for his apprehension.

The Northern people never understand this phase of the negro question until they are brought face to face with it. In The Times of yesterday was the report of the lynching of a negro brute at Terre Haute, Ind., for assaulting a white woman. The mob broke the jail open, took the prisoner out and hung him, after which they

cut the body down and burned it.

New York or in Indiana.

An anti-trust club of five hundred smokers has been formed at New Bedford, each member being pledged not to use tobacco made by the tobacco trust. Now, if all the anti-trust people in the United States will imitate the example of this New Bedford club the trust question will soon be solved, for the trusts will have to shut up shop and go out of business. But the trouble is that these antitrust people are among the best friends that the trusts have, because they consume the goods which the trusts make. There are many people who denounce the trusts on the streets and yet go right into the stores and buy the goods which the trusts make when they could just as well buy goods which are made by others. The reason for all this is very plain. The best and cheapest goods on the market are those made by the trusts, and so long as that continues the consumers are going to buy trust-made goods.

In commenting several days ago on the expulsion of a professor from Leland Stanford University for talking too freely, we said that if any teacher in the public schools of Richmond should express his views too freely on the subject of politics or a religious doctrine he would very soon find himself without an occupation. The New York Tribune in an article yesterday discusses the same subject in much the same way.

"Suppose," says our contemporary. "that a professor in the Princeton Theological Seminary should see fit to instruct his classes that God is a mere 'stream of tendency;' that there is no assurance of a future life, and that in any case the theory of a divine atonement for human faults is absurd. Would the professor asserting such propositions and urging his pupils to accept them be dismissed, with or without the formality of a forced resignation? Or would be be retained and honored as a noble example of freedom of teaching at Princeton?"

Free speech is all right, but every man must have some discretion in exercising the right of free speech.

The Tri-State Medical Association has made no mistake in electing Dr. John N. Upshur, of Richmond, president. Dr. Upshur is an able and conscientious physician of the old school, consecrated to the profession, and the arch enemy of quacks and quackery. The affairs of the association will be quite safe in his hands and its every interest protected.

The New York Sun says:

"A remarkable law passed by the Virginia Assembly lays a State tax of \$500 on peddlers, but allows farmers and truckers to hawk their own proand truckers to hawk their own produce. The constitutionality of the law is to be tested, and there can be little doubt of the decision of the court. The Southern and Western Legislatures are especially fond of this sort of law. Probably they don't care whether the statute will hold water or not. They want the 'farmer vote,' and they are not to blame for the 'tyranny of the courts.'"

Our objection to all such laws is that through them the taxing power is employed for some purposes other than to raise revenue. We do not believe in using the taxing power as a police regulation, or for any other purpose than to raise revenues needed by government for legitimate expenses, and hence we are opposed to tariff for protection and the prohibitory tax on State bank issues.

CURRENT TOPICS.

The historian of the Chicago Chronicle gets in a word that is timely:

With the first mutterings of tariff war v combined Europe against the States here comes that grand old statistician, Colonel Robert P. Porter, his coattails streaming in the wind and his hair standing on end, shouting to the Administration for Heaven's sake to make con-cessions to the enemy and to negotiate reciprocity treaties wherever possible. Yet, if any one man has been especially prominent in bringing about the present situation Colonel Porter is the man. He has been a professional tariff whooper has been a professional darm whoofer for a quarter of a century—a preacher of the dectrine that national salvation lay in high tariffs alone. If now he recants and advises surrender the tariffites are indeed in a bad way.

Times that no English blood flows in the veins of Edward VII., descendant of Edward the Confessor, and recently irrevently dubbed by an American paraprapher, twitting cruelly on past personal facts in the new mon-arch's history, "Edward the Carresser." The Australian analysist proceeds to vivisect the heir apparent and present occupant of the throne "at ome, as if it were Professor Witthaus and the poor King were Mrs. Benham's liver, and arrives at the following result of its investigations in his constituent hereditary atoms:

A writer in the current number of Ainslie's Magazine discusses the origin of the term "yellow journalism," now worldwide in use. Among newspaper-men he finds some controversy on the subject, but the consensus of opinion is that when Mr. Arthur Brisbane, now managing editor of the Evening Journal, suggested to Mr. Outcault, the artist, that he introduce in the Sunday World one of Phil. May's gutter-snipe sketches from a London pub lication he lay the fuse that was soon to be touched. Brisbane was then on the Sunday World, and that paper immediately became popular for its comic sup-plement containing Outcault's "Kid pic-tures." On the Sunday that New York entertained Li Hung Chang Mr. Outcault brought out his tough boy, who had always worn a sort of nightgown in vivid yellow, with the words issuing from his mouth: "Gee, I got a yellow shirt, too!" Thenceforward the comic prodigy

was kept in that same colored garb.
What had been a passing thought and fancy of Mr. Brisbane now developed into a valuable asset to the business office of the World. Accordingly, when Mr. Hearst bought both Mr. Brisbane and Mr. Out-cault, and they carried with them to the

John Brown and Carrie Nation-in committeed in Georgia, in Virginia, in Spain. It was near the end of the war when, newspaper men say, the term yellow journalism emerged from the collequial mint, and the credit for its coinage is ascribed variously to Richard Harding Davis and Peter F. Dunne (Mr. Dooley). Of Mr. Davis it is said that upon arriving in New York, after having had som lisagreement with Mr. Hearst, he re marked savagely to some correspondents:
"Well, I'm done with yellow journalism."
Mr. Dunne's friends insist that he first
used the term in one of his "Dooley"
articles, and neither of these gentlemen has as yet succeeded in convincing the other of his unworthiness of the claim.

The Democrats of Spotsylvania county will assemble in mass-meeting at the county seat next Monday (March courtday) to decide on a method to select a candidate for the Constitutional Conven-tion and to elect a county chairman.

The farmers in this section say the month now nearing its close has been the finest for out-door work they have ever known. In consequence a large quantity of cord-wood and railroad ties have or cord-wood and railroad ties nave been cut and brought into market, the roads having been in splendid condition for hauling nearly all winter. Farm work, too, is well ahead. A, winter drought is prevailing and the roads and streets are as dusty as in summer.

NEW YORK, Feb. 27.—Commissioner
Murphy promises to be unrelenting in his
war on gambling and all other kinds of vice in New York city. He has issued the following order to his captains:

To the Botanic Blood Balm (B. B. B.)
treatment for impure blood and skin disease is now recognized as a sure and certain cure for the most advanced stages of Cancer, Eating, Running Sores, Eczema, Itching Skin Humors, Scabs or Scales, Syphilitic Blood Poison, Scrofula, Ulcers, Persistent Eruptions, Pimples, Boils, Aches and Pains in Bones, Joints or Back, Swollen Glands, Risings and Bumps on the Skin, Thin Blood, Weak Eyes, as tired in the morning as when you went to bed, all run down, Rheumatism or Catarth, or any form of Skin or Blood Diseases.

If you doubt that B. B. B. will do all this, then study the photographs of C. W. Robinson, of Augusta, Ga.

From photograph before and after using Blood Balm for Pimples, Eruptions and Pestering Sores, Aches and Pains, Mr. Robinson's blood was made pure and rich, all sores healed and aches and pains of rheumatism stopped, by taking only 8 bottles of B. B. B., although doctors and patent medicines had utterly failed to cure him.

Mr. Robinson's cure is only a sample case, as men, women and children are being cured in every State by Botanic Blood Balm (B. B. B.), for purifying the blood, leaving the skin free from eruptions and rosy, with evidence of pure, rich blood. No sufferer need longer despair—help is at hand—no matter how many discouragements you may have met with Retains Ellood Balm (B. B.
